

B2BCatalogOrderOptionRange

from	
type	<code>xs:decimal</code>
unit	like defined for the <code>orderoption</code>
occurs	1
description	Defines the smallest value that can be entered for the element of the <code>orderOption</code>
to	
type	<code>xs:decimal</code>
unity	like defined for the <code>orderoption</code>
occurs	1
description	Defines the largest value that can be entered for the element of the <code>orderOption</code>
step	
type	<code>xs:decimal</code>
unity	like defined for the <code>orderoption</code>
occurs	1
description	Defines the step value that can be entered for the element of the <code>orderOption</code>
recommended	
type	<code>xs:decimal</code>
unity	like defined for the <code>orderoption</code>
occurs	0..1
description	Defines the recommended value that can be entered for the element of the <code>orderOption</code>
numValues	
type	<code>B2BCatalogOrderOptionRangeNumValue</code>
occurs	1

description	Defines the one or more numeric values that can be entered for the element of the orderOption
recommendedNumValue	
type	xs:decimal
unity	like defined for the orderoption
occurs	0..1
description	Defines the recommended numeric value that can be entered for the element of the orderOption
textValues	
type	B2BCatalogOrderOptionRangeTextValues
occurs	1
description	Defines the one or more text values that can be entered for the element of the orderOption
recommendedTextValue	
type	xs:string
occurs	0..1
description	Defines the recommended text values that can be entered for the element of the orderOption
