

Version 6.10.5

The price list information is split across a total of 11 files. When delivering the files, all files must be combined into a single ZIP file. All files in the ZIP file are essential for delivery.

File names in the ZIP file

File name	Content
Head.Dat	General information about the manufacturer and the price list, as well as the definition of cylinder and prism groups. Furthermore, all parameters that may occur only once are defined here.
LensType.Dat	Specification of the base lenses. The products are identified by a unique manufacturer code.
LensRange.Dat	Manufacturing ranges and availability ranges for products and product combinations
LensGeo.Dat	Description of the position of the lens reference points and lines for each base lens
LensPrice.Dat	Prices of base lenses for various application areas and availability options
Options.Dat	Specification of additional surcharges, finishes and colour groups. The products are identified by a unique manufacturer code.
OptionsColor.Dat	Specification of the various individual colours per colour product
OptionsPrice.Dat	Prices of additional finishes as well as for higher and prismatic effects
Combination.Dat	Information on restrictions regarding the combinability of additional finishes
Information.Dat	Additional product information
OeCodes.Dat	Erfa codes and OPC codes for glass and coatings
OrderOptions.Dat	List of fields that must or may be specified when ordering glass
ProductGroup.dat	Used to group glasses and options into a product group.
CodeSubstitution.Dat	Mapping of old, no longer valid IT codes to new IT codes.
BaseCurve.Dat	Availability ranges for base curves

Definition of the ZIP file name

The name of the ZIP file is defined as follows:

ManufacturerCode-ManufacturerSubcode-LanguageVersion-CountryCode-ValidFrom-Version.zip

Example: HLD-IGA-DE-DE-20040401-1.zip

The version is simply a sequential counter and starts at 1. If no manufacturer subcode is available, this code is omitted. Example: HLD-DE-DE-20040401-1.zip

The identifier for the language version is defined according to 'ISO 639-1 Alpha-2'. See also http://en.wikipedia.org/wiki/ISO_639

The country code is defined as a two-letter code in accordance with "ISO 3166-1 ALPHA-2". See also http://de.wikipedia.org/wiki/ISO_3166_Kodierliste

Manufacturer-specific files

It may happen that, for a specific product range from a manufacturer, the current definition is insufficient for displaying availability. In such cases, it is possible to integrate manufacturer-specific data formats.

However, no manufacturer-specific files have been defined as yet.
