B2BCatalogOrderCodeVariantMatching

b2bOpticLensCatalog→lenses→lens→orderCodeVariants→orderCodeVariant

optionCode	
type	B2BCatalogCode
occurs	1..∞
description	describes the option/options that is/are matched with the basic lens, to create a combination with a new lens code (used for markets where each single combination of base lens and option needs a separate lens code)

```
<xs:complexType name="B2BCatalogOrderCodeVariantMatching">
  <xs:sequence>
    <xs:element maxOccurs="unbounded" name="optionCode"
type="B2BCatalogCode"/>
  </xs:sequence>
</xs:complexType>
```
