B2BCatalogOrderOptionRange

from	
type	xs:decimal
unit	like defined for the orderoption
occurs	1
description	Defines the smallest value that can be entered for the element of the orderOption
to	
type	xs:decimal
unity	like defined for the orderoption
occurs	1
description	Defines the largest value that can be entered for the element of the orderOption
step	
type	xs:decimal
unity	like defined for the orderoption
occurs	1
description	Defines the step value that can be entered for the element of the orderOption
recommended	
type	xs:decimal
unity	like defined for the orderoption
occurs	0..1
description	Defines the recommended value that can be entered for the element of the orderOption
numValues	
type	B2BCatalogOrderOptionRangeNumValue
occurs	1

description	Defines the one ore more numeric values that can be entered for the element of the orderOption
recommendedNumValue	
type	xs:decimal
unity	like defined for the orderoption
occurs	0..1
description	Defines the recommended numeric value that can be entered for the element of the orderOption
textValues	
type	B2BCatalogOrderOptionRangeTextValues
occurs	1
description	Defines the one ore more text values that can be entered for the element of the orderOption
recommendedTextValue	
type	xs:string
occurs	0..1
description	Defines the recommended text values that can be entered for the element of the orderOption
