

frame (Frame)

[b2boptic](#) → [items](#) → [item](#) → [pair](#) → frame

quantity	
type	integer
use	required
description	value is everytime 1
material	
type	FrameMaterials
occurs	1
description	type of frame
manufacturer	
type	string
occurs	0..1
description	manufacturer code of the frame
brand	
type	string
occurs	0..1
description	brand code of the frame
model	
type	string
occurs	0..1
description	model code of the frame
size	
type	FrameSize
occurs	0..1
description	Nominal size information as given from frame manufacturer
color	
type	string
occurs	0..1
description	color code of the frame
commercialCode	
type	string
occurs	0..1
description	the commercial ordering code of the frame
shape	
occurs	0..1
description	
catalog (element of shape)	
type	string
occurs	1 (not together with explicit or tracerData)
description	shape code of a list of standard shapes from the lens manufacturer
type (attribute of catalog)	
type	ShapeCatalogTypes
use	optional
description	

name (attribute of catalog)	
type	string
use	optional
description	
shapeld (element of catalog)	
type	string
occurs	1
description	code to identify the shape
explicit (element of shape)	
type	Shape
occurs	1..2 (not together with catalog or tracerData)
description	shape is described by radii; usually with 36 points per side
side (attribute of explicit)	
type	SidesSimple
use	required
description	shape side
tracerData (element of shape)	
type	TracerData
occurs	1 (not together with catalog or explicit)
description	data from a tracer interface
boxWidth	
type	float
unity	mm
occurs	0..1
description	measured box width for size transformations
boxHeight	
type	float
unity	mm
occurs	0..1
description	measured box height for size transformations
distanceBetweenLenses	
type	float
unity	mm
occurs	0..1
description	measured dbl for calculation purposes
drillHoles	
type	DrillHoles
occurs	0..2
description	describes the drillholes for calculations or drilling; for drilling by the lens manufacturer, a special parameter needs to be set
side (attribute of drillHoles)	
type	Sides
use	required
description	shape side
pantoscopicAngle	
type	float

pantoscopicAngle	
unity	see attribute dimension
occurs	0..1 (not together with pantoscopicAngleRight or pantoscopicAngleLeft)
description	

dimension (attribute of pantoscopicAngle)

type	AngleDimension
use	optional
default	DEG
description	unity of pantoscopicAngle

pantoscopicAngleRight	
type	float
unity	see attribute dimension
occurs	0..1 (not together with pantoscopicAngle)
description	

dimension (attribute of pantoscopicAngleRight)

type	AngleDimension
use	optional
default	DEG
description	unity of pantoscopicAngleRight

pantoscopicAngleLeft	
type	float
unity	see attribute dimension
occurs	0..1 (not together with pantoscopicAngle)
description	

dimension (attribute of pantoscopicAngleLeft)

type	AngleDimension
use	optional
default	DEG
description	unity of pantoscopicAngleLeft

frameBowAngle	
type	float
unity	see attribute dimension
occurs	0..1
description	

dimension (attribute of frameBowAngle)

type	AngleDimension
use	optional
default	DEG
description	unity of frameBowAngle

frameCurve	
type	float
unity	dpt
occurs	0..1
description	

frameReferenceId	
type	string
occurs	0..1
description	identifier to match a send-in frame to the order for fitting. This reference is used, if the referenceNo of the item cannot be used, because of later lens ordering than sending the frame.

```
