

Online meeting 9 February 2026

Overview

Duration: 44 minutes

Participants: Katrin Wurdinger, Gerd Bernau, Richard Martinek, Nicole Spaeth, Sylvia Estermann, Malte Neumann, Avijit Rastogi, Diana Kroll, Uwe Freitag, Thomas Baecker

1. Summary of the meeting

1.1 Open items / homework

- Gerd will provide the summary of the existing B2B Optic formats by the next meeting.
- In general: lists of each person's own use cases/requirements have not yet been created – to be completed by the next meeting.

1.2 B2B Optic formats -- status & findings

Currently existing formats:

- Lens Order (LC7, SF6) – standard order
- Lens Info – feedback on the order (success/error, minimal data)
- Job Data – exchange of order data between programs
- Lens Request – role partly unclear; contains status queries, partly used for calculations
- Webservice (SOAP) – outdated specification, last version 2017

Discussion/findings:

- Documentation partly outdated; a clear stocktaking is required.
- Unclear who uses which format in which version; proposal: forum survey and/or circular email.
- Check whether formats should be merged, renamed, or harmonised in content.

1.3 Extension "B2B Optic Info"

- Requirement (raised by Nicole): extended, returned order data including progress indication (status: received, in production, shipped, error, etc.).
- Open: implementation via Lens Info, Lens Request, or a dedicated/extended schema; content structure to be clarified.

1.4 Originator / order parties -- clarification needed

- Question: may/will „Originator“ occur multiple times in the schema? Validation rules to be defined if needed.

- Further approach: technical discussion and documentation in the forum.

1.5 In-person meeting -- planning June 2026

- Goal: documentation (wiki), format content, specification maintenance, work on LC7/editor.
- Preferred time window: 8–10 June 2026 (Mon–Wed); Diana is checking „Mausmühle“ availability.
- Attendance: core team (incl. Katrin, Nicole, Gerd, Sylvia, Diana, Malte) + possibly further IT colleagues; room requirements still to be confirmed.

1.6 Complete spectacles -- next topic block

- Requirements currently vague; main challenge: linking the frame catalogue to lens/product data (SF6/SC7).
- Uwe: initial experience available; to sketch out requirements/use cases by the next meeting.

1.7 Minutes process

- Katrin creates the summary; sent to all participants.
- Objections within one week
- followed by publication in the wiki by Gerd > forum for further discussions.

1.8 Editor beta -- new filters

- New filtering options by lens properties and delivery dates; initial tests positive.

1.9 Next online dates

- 9 March 2026
- 13 April 2026
- 11 May 2026

2. Agenda for the next meeting (9 March 2026)

1. Update: overview of all B2B Optic formats (Gerd) – usage/versions, gaps, modernisation proposals
2. B2B Optic Info – extensions: review of forum requirements; decision Info vs. Request
3. Originator / order parties: clarification of multiple occurrences + validation rules
4. Complete spectacles: presentation of initial requirements (incl. Uwe), collection of use cases, next step
5. In-person meeting June: feedback from Mausmühle, finalise date (8–10.06), participants & rooms
6. Wiki/translation: update on the translation plugin, define maintenance process
7. Miscellaneous: experience with editor beta, new topics
