B2B Optic Monthly Meeting 14 September 2026

Overview

Date: 14.09.2026
Duration: 33 minutes
Moderator: Katrin Wurdinger

Participants

- Katrin Wurdinger (Rodenstock)
- Britta Neustadt (Rathenower Optik/Fielmann Group)
- Sylvia Estermann (Comcept)
- Caroline Waltes (representing Melinda Kraus, Rupp + Hubrach)
- Malte Neumann (Prisma)
- Avijit Rastogi (ZEISS)
- Nicole Spaeth (ZEISS, joined later)

Key discussion points

Introduction round: New participants Britta Neustadt and Caroline Waltes introduced themselves. Overview of roles and responsibilities within the B2B Optic environment.

LC7 status: The introduction of LC7 remains open. For testing, lens manufacturers need to maintain corresponding data so that software vendors can validate their systems.

SF6 and colour codes: Discussion on Fielmann's requirement for four-digit colour codes. In the SF6 standard, colour codes are currently limited to three digits. Mapping tables between internal and external codes were discussed as a possible solution.

Lens geometry: Questions regarding the representation of lens geometry in SF6 were discussed. Nicole Spaeth explained that the geometry in SF6 is comparatively simple and all values are kept positive.

B2B Optic wiki and forum: New participants were pointed to the wiki and forum. Questions and requirements should be documented and discussed there.

Prism and cylinder pricing logic: Clarification that P1 to P6 are used exclusively for price determination and are not exported as options.

Decisions and outcomes

- Four-digit colour codes cannot be directly represented in the current SF6 standard.
- LC7 remains a strategic goal; concrete implementation is still open.
- New participants will be given access to the wiki and forum for active collaboration.
- Open technical questions will be clarified via Sylvia Estermann or in the forum as needed.

Open items / actions

Responsible	Action
Sylvia Estermann	Forward information about the forum and wiki to new participants
Gerd Bernau	Confirm storage and availability of the minutes
Nicole Spaeth	Continue working on the B2B Optic Info forum topic until the next meeting
Britta Neustadt	Review requirements for colour codes and lens geometry in the SF6 context

Next meeting

12 October 2026 (recurring B2B Optic Meeting).
